

CMF MANUFACTURING

Customer Evaluation Report · As of June 03, 2026

CONFIDENTIAL — INTERNAL USE ONLY

This report ranks all active customers by a composite **Priority Score** that weighs open work volume, relationship depth (historical completions), on-time delivery performance, and current risk (overdue parts, issues logged). Use it to identify which customers to **go all-in on** for premium service focus.

Top Customers by Priority Score

RANK	CUSTOMER	OPEN POS	OPEN LINE ITEMS	OPEN QTY	OVERDUE PARTS	NEAREST DELIVERY	DAYS OUT	HIST. COMPL.	ON-TIME RATE	ISSUES LOGGED	PRIORITY SCORE

Priority Score formula: (Open POs × 15) + (Open Line Items × 8) + (Open Qty / 100, max 50) + (Historical Completions × 5) + (On-Time % × 0.3) – (Issues × 10) – (Overdue Parts × 12). **On-Time Rate** is calculated from the production LOG (completions vs. original due dates). **Hist. Compl.** = total process steps recorded in LOG for this customer (relationship depth indicator). Customers with **zero open work and zero history** are excluded.
